

**Write a program to check a string comparison using loop and a write junit code, solve white box testing in development side**

```
package reverse;
import static org.junit.Assert.assertEquals;

import java.util.Scanner;

public class number {

    Scanner in=new Scanner(System.in);

    System.out.println("enter the user name");

    String str1=in.nextLine();

    System.out.println("Reenter the user name");

    String str2=in.nextLine();

    assertEquals(str1,str2);

}

}
```

**Output:**
